Single point of contact for 24/7/365 U.S.-based support.

OUR LEGACY

25 years of experience and 1000's of business clients.

THE SIGNS OF COMPLEXITY

- 89 locations.
- Multiple monthly invoices.
- Multiple telecommunication network providers.

THE CHALLENGES OF COMPLEXITY

A U.S.-based wholesale distributor of electrical products and services was seeking to simplify a complex 89-location technology infrastructure. Their search for a single source wholesale aggregator led them to a trusted agent partner for assistance with their initial network specifications. The partner, aware of BCN's expertise in multi-location, multi-service, multi-network deployments, engaged BCN to conduct a network qualification and discovery process.

BCN FINDS SIMPLICITY IN COMPLEXITY

During the process, the BCN network engineering department, working in concert with the customer's internal IT department identified many "must have" additional services. In addition to the required services, the customer placed a high value on BCN's project management and installation capabilities as well as their ability to customize their invoicing on a granular level.

In the end, BCN working hand-in-hand with the agent partner, secured the bid by presenting a superior solution, in terms of network engineering, and reduction of the customer's monthly recurring charges. The customer is excited to consolidate all of their telecom services, leverage their total spend, reduce their operating costs and gain access to newer technologies and management tools.

BCN was able to meet every request the customer made. The BCN team was extremely responsive and professional throughout the customer evaluation process and the BCN engineering team was there every step of the way to guide the customer. The CIO of this customer has complete trust in BCN's ability to execute and perform."
