

Cloud Fax Services

A comprehensive Cloud Fax and document distribution solution to maximize productivity and cost-savings

Businesses face increasing pressure to improve employee and process productivity, and to reduce operational costs. Whether an organization is small, medium or large, a Cloud Fax solution from BCN meets these challenges by integrating and automating enterprise fax and document distribution with a company's existing business applications.

The Business Challenge

Many organizations rely on traditional, stand-alone fax machines, postal mail and expensive couriers to deliver vital business documents. Examples include documents requiring signatures such as loan applications, purchase orders, legal documents, invoices, financial statements, medical records and more.

Traditional document delivery methods like these lack integration with business applications and lead to high document distribution costs and threats to compliance and privacy.

The Benefits of BCN Cloud Fax

- Dramatically decreasing document distribution costs by digitally delivering documents from the desktop

- Protecting compliance and privacy by electronically delivering tamper-resistant documents, and reducing risk by ensuring documents do not sit on fax machines in public areas
- Integrating seamlessly with virtually any ECM, ERP, CRM, HIM, MFP, VoIP network, and many industry applications to maximize and extend the value of existing technology, infrastructure, and application investments

BCN ADVANTAGE

We have the high-performance solutions, state-of-the-art technology, and exceptional customer care your business deserves. As a communications and technology solutions leader for 30 years, BCN understands how to solve your toughest network challenges and build a solution that fits your needs.
