

BCN WIRELESS SOLUTIONS

BCN offers a variety of wireless solutions that can be uniquely tailored to meet each customer's specific needs. Whether for primary, back-up/failover, or hard to reach locations, customers with multiple locations can be assured that BCN's range of wireless options means we'll get you connected.

UNLIMITED 5G WIRELESS BUSINESS INTERNET

- NO data allowance thresholds or overage charges
- Available in two speeds. 100M x 10M and 200M x 20M.
- Suitable for primary or back-up/failover connections
- New 5G-specific end-point devices now available
- Future Proof performance by planning for 5G Unlimited service with the 5G compatible end-point devices. Enjoy the same unlimited data plan on a 4G LTE network, and easily make the switch when 5G service is available at your location.

BCN 4G LTE WIRELESS

- Provides uninterrupted Internet connectivity in the event of network failure
- Ensures business continuity, access to the Internet, your corporate network and critical applications

BCN FIXED WIRELESS

- Provides a dedicated point-to-point Internet connection
- Easy to deploy, reliable, high-speed alternative to fiber access
- Cost-effective - high quality, dedicated bandwidth, with low jitter and latency

BCN SATELLITE BUSINESS INTERNET

- Enables critical business applications: voice over IP, point-of-sale transactions, cloud backup, file downloads, online collaboration and more
- Better Backup Connection
- Prioritized Connection
- Quick Installations - typically in 3 to 5 days!
