

Wireless Solutions

Our wireless solutions are ready to take a starring role or serve as your trusted backup. BCN's 5G Unlimited and 4G LTE wireless data services are fast and reliable alternatives that are cost-effective and quick to install and deploy. And for critical applications in hard-to-reach locations, BCN's satellite business internet offers 35/4 Mbps (download /upload) plans - or faster- to over 96% of the U.S. population.

Unlimited 5G Wireless Business Internet

- NO data allowance thresholds or overage charges
- Available in two speeds. 100M x 10M and 200M x 20M
- Suitable for primary or back-up/failover connections depending on your business requirements
- Future Proof performance by planning for 5G Unlimited service with 5G compatible end-point devices. Enjoy the same unlimited data plan on a 4G LTE network, and easily make the switch when 5G service is available at your location.

4G LTE Wireless

- BCN's 4G LTE wireless assures you have uninterrupted Internet connectivity in the event of a network failure, and that your data is safely backed up should terrestrial connections go down.
- 4G LTE wireless ensures business continuity, access to the Internet, your corporate network, critical applications and the ability for customers to reach you, transact business and process payments.
- BCN partners with Cradlepoint as its primary wireless end-point device deployment solution, capable of addressing basic or advanced configuration requirements. A BCN advanced enterprise service solution includes advanced edge routing, a primary Internet access service, automatic 4G LTE wireless data fail-over service and WiFi capabilities.

Fixed Wireless

- BCN's fixed wireless solution delivers a reliable, high-speed alternative to fiber access, and can be rapidly deployed as there is no dependency on underground fiber runs, construction and more.
- Fixed wireless provides a dedicated point-to-point Internet connection and is a cost-effective solution for businesses that need high quality, dedicated bandwidth, with low jitter and latency.
- BCN's Professional Field Services team will manage the low-impact installation of the fixed wireless service which is relatively simple when compared to what is involved with wired services.

Satellite Business Internet

- BCN's Viasat-based satellite business Internet is ideal as a primary connection for those businesses with hard to reach locations, and can also serve as a secondary or tertiary solution as it provides a diverse and reliable connection when cable and fiber connections go down.
- BCN satellite business Internet offers 35/4 Mbps (download/upload) plans to over 96% of the U.S. population. In select areas you can also get 60/4 Mbps and 100/4 Mbps plans. In the few places where 35/4 Mbps is not available, we offer 12/3 Mbps.
- Satellite Internet enables critical business applications such as voice over IP, point-of-sale transactions, cloud backup, file downloads, Online collaboration, and more.

NETWORKING FOR A WORLD OF 24/7 CONNECTIVITY

In an always-connected world, if you can't trust your network, your employees and customers can't trust you. Smart businesses rely on BCN's decades of experience and up-to-the-minute technology expertise to transform their networks from bottlenecks into accelerators.
