

POTS Replacement Solutions

Advance your business toward digital transformation

Is your business challenged by remaining copper telephone lines still at work inside your network?

Providing a pathway to transition critical business services to a cloud-based solution is at the heart of our extensive POTS replacement portfolio. We offer alternatives for analog specialty and voice line applications, transforming them into more cost-effective, future-proofed, cloud-enabled solutions that deliver superior reliability and performance.

From POTS Over LTE to UCaaS, SIP/SIP PRI, and Cable Voice - we'll match the right technology to the applications and business priorities of your organization.

BCN POTS Over LTE

BCN's fully monitored and managed POTS Over LTE solution connects fire alarms, emergency systems, fax machines, elevators, voice lines and more to help your business meet regulatory and compliance requirements. MFVN compliant ATA device supports up to 8 lines per device with as much as 24-hour battery backup. Redundant connectivity via wired and 4G LTE enables always-on connectivity for voice service, while Traffic Shaping/QoS Management prioritizes traffic and optimizes network efficiency. A built-in powerful firewall secures traffic and prevents unauthorized access.

Cloud Voice - UCaaS

IP connected Cloud-based PBX service utilizing BCN's state-of-the-art Cloud Voice Platform. All the advanced features and functionality of an on-premise phone system in a fully integrated, truly geo-redundant UCaaS solution providing voice service to a computer, smartphone, or physical IP phones.

Cloud Voice - SIP/SIP PRI

Gain the flexibility, functionality, and features of Cloud Voice with BCN SIP services. SIP PRI integrates with your on-premises phone system to maximize your communications infrastructure while minimizing service disruptions. Additionally, SIP Trunking enables IP PBX to run voice over your data network, while replacing big-ticket phone lines and PRIs.

Cable Voice

Take advantage of cloud voice services delivered over some of the nation's largest and most advanced communications networks. A single device solution for POTS replacement and broadband connectivity. Features include Caller ID, Hunting, Directory Listing & Unlimited Domestic usage.

Talk to BCN about the best way to mitigate the rising cost of analog lines and deliver immediate and year over year savings.
