

Reduce Downtime. Improve Uptime. Restore Service Faster.

BCN RPM is a fully managed remote power management solution designed to improve uptime, reduce downtime, and simplify troubleshooting for business-critical devices.

Powered by the WattBox platform, BCN RPM enables remote monitoring and control of up to three connected devices through a secure cloud-based portal. Whether supporting internet connectivity, point-of-sale systems, digital signage, or other connected technologies, BCN RPM helps businesses quickly recover from common device and network issues without requiring an onsite visit.

With the ability to remotely reboot equipment, automate scheduled power cycles, and automatically respond to connectivity failures, BCN RPM delivers a simple and cost-effective way to keep business operations running smoothly.

Monitor

Continuously monitors internet connectivity and device status.

Detect

Identifies connectivity interruptions and service-impacting events.

Respond

Automatically or manually power cycles designated equipment.

Restore

Returns devices to service quickly, often without requiring an onsite visit.

Ideal Applications

Network & Internet Equipment

- Routers
- Modems
- Gateways
- Access Points
- Network Switches

Business Systems

- Point-of-Sale Systems
- Digital Signage
- Kiosks
- Self-Service Devices

Connected Technologies

- IoT Devices
- Sensors
- Controllers
- Media Players
- Streaming Devices

Key Advantages

Improve Uptime

- Minimize service disruptions and connectivity issues
- Restore service faster through remote and automated power cycling
- Increase reliability for business-critical systems

Reduce Support Costs

- Eliminate unnecessary truck rolls and onsite service visits
- Resolve many common technology issues remotely
- Reduce troubleshooting time and improve response times

Enhance Business Operations

- Keep network and connected devices operating efficiently
- Support both BCN-managed and customer-owned equipment
- Improve the overall customer experience

Simple, Fully Managed Solution

- Deployment and configuration managed by BCN
- Secure cloud-based monitoring and management
- Easy access through the OvrC Connect mobile application

Built around the WattBox Platform

- Provides 3 independently controlled outlets
- Allows remote reboot and device-level power management through OVR Connect
- Surge protection for sensitive equipment
- Noise filtration for cleaner power
- Compact footprint for flexible installation

WE ARE BCN

A communication technology solutions provider with the flexibility and experience to address every need uniquely. Creating tailored solutions based on the portfolios of 100's of wholesale network & technology partners.

SINGLE PROVIDER
A single-source for custom-configured solutions.

UNIFIED BILLING
All services at all locations on one monthly invoice.

CUSTOMER CARE
Single point of contact for U.S. - based support.

OUR LEGACY
Decades of experience and thousands of business customers.
